

Multi-resistant Oil radish

ANGUS

The new generation of power

Benefits:

- Beet Cyst Nematode control on top level, more than 90 % reduction of *Heterodera schachtii* (resistance level 1) and effective reduction of Corn Root Knot Nematodes (*Meloidogyne chitwoodi*)
- Multi-resistance: key for effective reduction of various nematodes and diseases
- The quick ground coverage from **ANGUS** suppresses weeds and volunteer plants
- Fast and healthy initial development adds up to organic matter and supports soil fertility
- Deep and thorough rooting breaks up soil compaction and enhances soil holding capacities

Variety characteristics: (Officially confirmed or respectively in line with Bundessortenamt)

bad / early / short / low good / late / long / high / tall

Resistance against <i>Heterodera schachtii</i>	Resistance level 1
Initial mass formation	7
Tendency to flower	4
Stiffness	7

Multi-resistant Oil radish

ANGUS

The new generation of power

Usage:

Multi-resistant
Reduction of Beet Cyst Nematodes
Reduction of Tobacco Rattle Virus
Green manure
Ground water protection / Nitrogen conservation
Mulch sowing
Humus formation
Protection against erosion
Biofumigation

Crop rotation suitability:

+ suitable / ++ strongly recommended

Maize	++
Cereals	++
Oilseed rape	+
Sugar beets	++
Potatoes	++
Intensive crops	++
Legumes	++

Agronomic features:

bad / early / short / low good / late / long / high / tall

Weed suppression	9
Protection against erosion	8
Ground water protection / Nitrogen conservation	8
Humus formation	8
Cold- and frost resistance	5
Drought tolerance	7

Type of root	Tap root
Rooting depth	180 cm

Cultivation recommendations:

Recommended sowing rate	25 - 30 kg/ha
Sowing depth	2 - 3 cm
Sowing period	July till end August. In vegetable growing from May - it takes 6 - 8 weeks of vegetation in order to get a reduction.
Fertilization	40 - 60 kg N/ha
Crop protection	Usually there is no plant protection required.
Sowing method	In order to gain a fast and even development of the oil radish plants, drilling after careful soil preparation is recommended.
