Nematode resistant White mustard

ACCENT

Field tested high control level

Benefits:

- Up to 90 % nematode reduction in official test- resistance level 2
- Easy and convenient sowing, quick and complete soil coverage
- Excellent protection against erosion and conservation of nutrients during winter
- Assured freezing off and easy incorporation enable untroubled mulch sowing of the sugar beet
- Addition of organic matter in order to increase soil fertility, activation of soil life and improvement of soil structure
- Regular proper cultivation of resistant white mustard **ACCENT** ensures and increases yield and quality of the main crop
- Excellent suitable for agricultural blends

Included in blends: SortenGreening® ACCENT mit Alexandriner Klee

Variety characteristics: (Officially confirmed or respectively in line with Bundessortenamt)

	bad / early / short / low — good / late / long / high / tall
Resistance against Heterodera schachtii	Resistance level 2
Initial mass formation	7
Tendency to flower	4
Resistance to lodging	7

Züchter: P. H. PETERSEN Saatzucht Lundsgaard GmbH, Version: 06.05.2019 / 24.00

Nematode resistant White mustard

ACCENT

Field tested high control level

Usage:

Reduction of Beet Cyst Nematodes
Green manure
Ground water protection / Nitrogen conservation
Mulch sowing
Humus formation
Protection against erosion
As component suitable for greening blends

Crop rotation suitability:

+ suitable / ++ strongly recommended

Maize	++
Cereals	++
Oilseed rape	
Sugar beets	++
Potatoes	
Intensive crops	
Legumes	++

Agronomic features:

	bad / early / short / low — good / late / long / high / tall
Weed suppression	8
Protection against erosion	8
Ground water protection / Nitrogen conservation	8
Humus formation	6
Cold- and frost resistance	1
Drought tolerance	8

Type of root	Tuft root with strong main root
Rooting depth	120 cm

Cultivation recommendations:

Recommended sowing rate	20 - 25 kg/ha
Sowing depth	1 - 2 cm
Sowing period	August until middle of September - depending on location! Early sowing increases control success.
Fertilization	40 - 60 kg N/ha
Crop protection	Usually there is no plant protection required
Sowing method	Low requirements regarding sowing method: spreader or seed drilling
