

White mustard

ALBATROS

The great classic among the white mustard varieties

Benefits:

- Highly appreciated variety with quick and strong initial development even at late sowing dates
- Valuable green crop above-ground and intensive, deep rooting systems form a stable soil structure with a good humus balance
- **ALBATROS** freezes off in winter - good erosion protection by plant residues, also if already broken
- Nutrients are conserved in organic mass and protected against elution during winter, so they are available again in spring
- Recommended in water protection areas
- Practically proven for untroubled mulch sowing - especially in maize crop rotations
- **ALBATROS** is a ideal partner for agricultural blends

Included in blends: viterra® SCHNELLGRÜN, viterra® SCHNELLGRÜN LEGUMINOSENFREI

Variety characteristics: (Officially confirmed or respectively in line with Bundessortenamt)

	bad / early / short / low	good / late / long / high / tall
Initial mass formation		7
Tendency to flower		5
Stiffness		6

White mustard

ALBATROS

The great classic among the white mustard varieties

Usage:

Green manure
Ground water protection / Nitrogen conservation
Mulch sowing
Humus formation
Protection against erosion

Crop rotation suitability:

+ suitable / ++ strongly recommended

Maize	++
Cereals	++
Oilseed rape	
Sugar beets	
Potatoes	
Intensive crops	
Legumes	++

Agronomic features:

bad / early / short / low good / late / long / high / tall

Weed suppression	8
Protection against erosion	7
Ground water protection / Nitrogen conservation	8
Humus formation	6
Cold- and frost resistance	1
Drought tolerance	8
Type of root	Tuft root with strong main root
Rooting depth	120 cm

Cultivation recommendations:

Recommended sowing rate	15 - 20 kg/ha
Sowing depth	1 - 2 cm
Sowing period	August until September - depending on location!
Fertilization	40 - 60 kg N/ha
Crop protection	Usually there is no plant protection required
Sowing method	Low requirements regarding sowing method: spreader or seed drilling
