

marrow stem kale

ANGLIAN GOLD

Marrow stem kale for game blends with high frost tolerance

Benefits:

- Due to the low growth and the low frost susceptibility predestined for game cover
- Tasty nutrition for wild animals
- The dense, leaf-rich population offers protected habitat for smaller animals
- Excellent water protection due to high nutrient uptake
- Also suitable for fresh fodder and grazing
- **ANGLIAN GOLD** fits well in winter-hardy cover crop and game blends
- Deep tap roots improve the soil structure and increases the infiltration capacity of the soil

Variety characteristics: (Officially confirmed or respectively in line with Bundessortenamt)

	bad / early / short / low	good / late / long / high / tall
Dry matter yield	3	
Protein yield	4	
Initial mass formation	5	
Plant height	2	
Frost sensitivity	3	
Stem thickness	3

marrow stem kale

ANGLIAN GOLD

Marrow stem kale for game blends with high frost tolerance

Usage:

Green manure
Biogas- and fodder production
Protection against erosion
Humus formation
Game cover

Crop rotation suitability:

+ suitable / ++ strongly recommended

Maize	++
Cereals	++
Oilseed rape	
Sugar beets	+
Potatoes	+
Intensive crops	
Legumes	+

Agronomic features:

bad / early / short / low good / late / long / high / tall

Weed suppression	5
Protection against erosion	5
Ground water protection / Nitrogen conservation	7
Humus formation	3
Drought tolerance	2
Type of root	Tap root
Rooting depth	130 cm

Cultivation recommendations:

Recommended sowing rate	3 - 4 kg/ha
Sowing depth	1 - 2 cm
Sowing period	After early harvesting cereals until end of July
Fertilization	100 - 140 kg N/ha
Crop protection	Observing the weed pressure in pre-emergence and youth stadium if necessary implement regulation measure
Sowing method	Drill seed is recommended
Harvest	Depending on sowing date from July to January; from the standing stock, for fresh fodder or silage use
