

Winter triticale

BILBOQUET

High yields and robust

Benefits:

- High grain yield potential
- High protein yield and high production of biomass
- Very healthy with fusarium and yellow rust tolerance
- Suitable for grain and silage usage and organic farming
- Good frost tolerance

Included in blends: V-Max® ERBSENTRITICALE

Variety characteristics: (Officially confirmed or respectively in line with Bundessortenamt)

	bad / early / short / low	good / late / long / high / tall
Grain yield level 1 (extensive)		6
Grain yield level 2 (treated)		6
Thousand grain weight		5
Grains per ear		5
Crop density		5
Ear emergence		5
Maturity		5
Stiffness		5
Plant height		7

Winter triticale

BILBOQUET

High yields and robust

Usage:

Grain use
Biogas- and fodder production
Suitable for organic farming

Cultivation recommendations:

Recommended sowing rate	250 - 300 grains per m ²
Sowing period	Late September until mid October
Fertilization	Tillering stage 50-70 kg N/ha Bolting 60-90 kg N/ha
Crop protection	Dates and amounts are specific to the field and dependent on regional recommendations
Sowing method	Drill sowing ensures high crop emergences
Harvest	Late July until early August
