

Nematode resistant White mustard

FORUM

Effective, biological control of Beet Cyst Nematodes

Benefits:

- Up to 90% nematode reduction in official tests - Resistance level 2
- Long vegetative growing phase due to extremely delayed flowering
- The cultivation of **FORUM** helps to prevent capping and to keep nutrients in the topsoil available for the following crop
- Freezes off safely during winter and thus provides excellent conditions for mulch sowing of the following crop

Variety characteristics: (Officially confirmed or respectively in line with Bundessortenamt)

	bad / early / short / low	good / late / long / high / tall
Resistance against Heterodera schachtii	Resistance level 2	
Initial mass formation	7	
Tendency to flower	4	
Resistance to lodging	7	

Züchter: P. H. PETERSEN Saatzeit Lundsgaard GmbH, Version: 06.05.2019 / 3.00

Nematode resistant White mustard

FORUM

Effective, biological control of Beet Cyst Nematodes

Usage:

Reduction of Beet Cyst Nematodes
Green manure
Ground water protection / Nitrogen conservation
Mulch sowing
Humus formation
Protection against erosion
As component suitable for greening blends

Crop rotation suitability:

+ suitable / ++ strongly recommended

Maize	++
Cereals	++
Oilseed rape	
Sugar beets	++
Potatoes	
Intensive crops	
Legumes	++

Agronomic features:

bad / early / short / low good / late / long / high / tall

Weed suppression	8
Protection against erosion	8
Ground water protection / Nitrogen conservation	8
Humus formation	6
Cold- and frost resistance	1
Drought tolerance	7

Type of root	Tuft root with strong main root
Rooting depth	120 cm

Cultivation recommendations:

Recommended sowing rate	20 - 25 kg/ha
Sowing depth	1 - 2 cm
Sowing period	August until September - depending on location! Early sowing for succesful nematode control.
Fertilization	40 - 60 kg N/ha
Crop protection	Usually there is no plant protection required.
Sowing method	Low requirements regarding sowing method: spreader or seed drilling.
