

Benefits:

- Suitable for all native ground game species
- Blossoms are a magnet for numerous insects
- Tasty corn grazing for feathered game
- Winter-hardy components offer grazing and coverage for rabbits, roe deer and other ground game species in winter during frost
- **viterra® HORRIDO** is EFA-compliant in Germany for organic priority areas
- **Cropping tip:** sow parts of the areas with double grain distance in order to create attractive space for pheasants and partridges

Blend details:

Composition of blend Seeds %	9 % Berseem clover
	7 % Buckwheat
	2 % Marrow stem kale
	2 % Linseed
	1 % Oil radish
	16 % Persian clover
	6 % Phacelia
	4 % Saia oat / Bristle oat
	11 % Serradella
	1 % Sunflower
	20 % White clover
	13 % Italian ryegrass
	5 % Winter forage rape
	2 % Winter turnip rape
	1 % Winter vetch

with cruciferae, with legumes, winter-hardy

Usage:

EFA-compliant
Green manure
Humus formation
Protection against erosion
Mulch sowing
Pollinator attractiveness
Game cover

Crop rotation suitability:

+ suitable / ++ strongly recommended

Maize	+
Cereals	+
Oilseed rape	
Sugar beets	
Potatoes	
Intensive crops	
Legumes	

Agronomic features:

bad / early / short / low good / late / long / high / tall

Weed suppression	5
Protection against erosion	8
Humus formation	7
Cold- and frost resistance	8
Drought tolerance	6

Cultivation recommendations:

Recommended sowing rate	30 kg/ha
Sowing depth	1 - 2 cm
Sowing period	March to June
Fertilization	An early fertilization to promote the initial development is recommended.
Crop protection	Usually there is no crop protection required
Sowing method	Drilling secures a good field emergence.
