

blue lupin

ILDIGO

Soil improver with depth effect

Benefits:

- Rapid initial development and high dry matter yields
- Ideal green manure plant, which can fix nitrogen in its root nodules
- Can grow independently of the nitrogen content of the soil and also provides mixing partner with the nutrient for growth
- ILDIGO thrives on loamy sand to sandy loam soils at medium pH (less calcium sensitive)
- An early sowing promotes the deep rooting, which can also break up soil compaction

Variety characteristics: (Officially confirmed or respectively in line with Bundessortenamt)

	bad / early / short / low	good / late / long / high / tall
Initial mass formation		6
Tendency to flower	3

blue lupin

ILDIGO

Soil improver with depth effect

Crop rotation suitability:

+ suitable / ++ strongly recommended

Maize	++
Cereals	++
Oilseed rape	++
Sugar beets	+
Potatoes	+
Intensive crops	+

Agronomic features:

bad / early / short / low good / late / long / high / tall

Weed suppression	6
Protection against erosion	6
Ground water protection / Nitrogen conservation	1
Humus formation	8
Cold- and frost resistance	1
Drought tolerance	3
Rooting depth	180 cm

Cultivation recommendations:

Recommended sowing rate	180 kg/ha
Sowing depth	4-6 cm
Sowing period	June - the End of July
