

White mustard

MIKADO

Quick growth and good suitability for late sowing

Benefits:

- Quick shading leads to a good weed suppression by light-, water-, and nutrient deprivation
- Very good suitability for mustard production
- High late sowing compatibility due to vigorous growth of **MIKADO**
- Formation of valuable organic substance, which strengthens the humus balance and the biological soil activity
- Well structured mulch-cover offers excellent protection against erosion
- Drought tolerant and assured freezing off

Variety characteristics: (Officially confirmed or respectively in line with Bundessortenamt)

	bad / early / short / low	good / late / long / high / tall
Initial mass formation		6
Tendency to flower		6
Stiffness		6

White mustard

MIKADO

Quick growth and good suitability for late sowing

Usage:

Green manure
Ground water protection / Nitrogen conservation
Mulch sowing
Humus formation
Protection against erosion

Crop rotation suitability:

+ suitable / ++ strongly recommended

Maize	++
Cereals	++
Oilseed rape	
Sugar beets	
Potatoes	
Intensive crops	
Legumes	++

Agronomic features:

bad / early / short / low good / late / long / high / tall

Weed suppression	7
Protection against erosion	7
Ground water protection / Nitrogen conservation	7
Humus formation	6
Cold- and frost resistance	1
Drought tolerance	8

Type of root	Tuft root with strong main root
Rooting depth	120 cm

Cultivation recommendations:

Recommended sowing rate	15 - 20 kg/ha
Sowing depth	1 - 2 cm
Sowing period	August until September - depending on location!
Fertilization	40 - 60 kg N/ha
Crop protection	Usually no plant protection required
Sowing method	Low requirements regarding sowing method: spreader or seed drilling
