

## Benefits:

---

- Quick greening due to very fast-growing components
- White mustard ALBATROS and indian mustard ENERGY make this blend especially suitable for late sowing (until mid-/late September)
- Varieties that are not winter-hardy allow strip tilling of the following crop in spring
- Ideal before maize and also suitable as a cover crop after early maize harvest
- Low seed bed requirements enable easy and cost-effective sowing
- **viterra® SCHNELLGRÜN** is especially recommended for maize crop rotations

## Blend details:

---

Composition of blend Seeds %	38 % White mustard ALBATROS
	21 % false flax
	21 % bigflower clover
	20 % brown mustard ENERGY

with cruciferae, with legumes, Without grass, not winter-hardy

**Usage:**

Green manure  
 Humus formation  
 Protection against erosion  
 Nitrogen fixation  
 Mulch sowing  
 Biofumigation

**Crop rotation suitability:**

+ suitable / ++ strongly recommended

Maize	++
Cereals	+
Oilseed rape	
Sugar beets	
Potatoes	
Intensive crops	
Legumes	

**Agronomic features:**

bad / early / short / low      good / late / long / high / tall

Weed suppression	8
Protection against erosion	8
Ground water protection / Nitrogen conservation	3
Humus formation	5
Cold- and frost resistance	2
Drought tolerance	8

Type of root	Tuft root
Rooting depth	120 cm

**Cultivation recommendations:**

Recommended sowing rate	15 kg/ha
Sowing depth	1 - 2 cm
Sowing period	Early August to mid-/late September - depending on location!
Fertilization	An early fertilization to promote the initial development is recommended.
Crop protection	Usually there is no crop protection required
Sowing method	Drill seed or spreader
