

Nematode resistant White mustard

VETO

Quick growth for a good conservation of nutrients

Benefits:

- High nematode resistance, in the upper range of resistance level 2
- VETO strengthens sustainable and long-term beet yields through the reduction of Beet Cyst Nematodes
- Leafy development for an effective suppression of weeds, good shadowing and support of tith
- **VETO** produces organic mass from available nutrients and increases the humus balance

Variety characteristics: (Officially confirmed or respectively in line with Bundessortenamt)

	bad / early / short / low	good / late / long / high / tall
Resistance against <i>Heterodera schachtii</i>	Resistance level 2	
Initial mass formation	6	
Tendency to flower	4	
Resistance to lodging	8	

Züchter: P. H. PETERSEN Saatzeit Lundsgaard GmbH, Version: 20.09.2018 / 8.00

Nematode resistant White mustard

VETO

Quick growth for a good conservation of nutrients

Usage:

Reduction of Beet Cyst Nematodes
Green manure
Ground water protection / Nitrogen conservation
Mulch sowing
Humus formation
Protection against erosion
As component suitable for greening blends

Crop rotation suitability:

+ suitable / ++ strongly recommended

Maize	++
Cereals	++
Oilseed rape	
Sugar beets	++
Potatoes	
Intensive crops	
Legumes	++

Agronomic features:

bad / early / short / low good / late / long / high / tall

Weed suppression	7
Protection against erosion	8
Ground water protection / Nitrogen conservation	7
Humus formation	6
Cold- and frost resistance	1
Drought tolerance	8

Type of root	Tuft root with strong main root
Rooting depth	120 cm

Cultivation recommendations:

Recommended sowing rate	20 - 25 kg/ha
Sowing depth	1 - 2 cm
Sowing period	August until early September - depending on location! Early sowing increases control success.
Fertilization	40 - 60 kg N/ha
Crop protection	Usually no plant protection required
Sowing method	Low requirements regarding sowing method: spreader or seed drilling
